

*"...I want to thank Soundscapes for making my dreams of a home theatre system a reality. My family and I can now enjoy watching a movie or a Kings game in the comfort of our own home with the same quality, if not better, than that of a movie theatre. I could not have asked for a friendlier or more professional group of people to work with..."*

*-Bob Tanon "Owner"  
Gym Stars  
Stockton, CA*

*"...Soundscapes designed and installed a complete low voltage package for my new residence, which included structure wire, central vacuum, alarm, cameras, home theatre, and whole house audio. Not only was I impressed with the quality of work, but also the professionalism of their staff..."*

*-Mike Miranda "Owner"  
MC Dairy Construction  
Turlock, CA*

*"...I chose Soundscapes for my home theatre equipment and service needs simply because of the quality and professional work that they perform. Efficient installation and excellent customer service add to the working experience with Soundscapes. I can honestly say that I'm a very satisfied customer..."*

Whole House Audio  
Central Vacuum  
Network Cabling  
Home Automation  
Lighting Control  
Intercom and Paging  
Surveillance  
Security Systems  
Security Monitoring  
Commercial & Residential

*Soundscapes was established in 2000 as a subsidiary of our electrical company. As the needs of our customers grew, we felt it would be the perfect transition for us to expand our parameters into the low voltage market. We stand behind 30 years of service and experience in the construction business.*

*With the increased demands of the digital era, we integrate technology with old-world craftsmanship.*

*Above: A second story floor opened up to install a projector in a downstairs living room.*

*Having a wired home or business is not limited to new construction. If you have the desire, we have the means to retro fit these technologies into your project. In many applications our creativity is tested to save the customer time and money.*

*Above: A 14" structure wire panel used to distribute telephone and television signals.*

*We have worked diligently to introduce consumers to new technologies such as structured cable. Structured wiring is the backbone of the residential low voltage system. It brings the complex infrastructure of commercial applications to your home. With consumer expectations on the rise, a wired home of the future has now become a necessity in this digital age. Structured wiring provides the hub for which all of these systems are integrated.*

*Above: Quality of workmanship is our number one priority.*

*Above: A doorbell/camera and security camera can be viewed on any television throughout the residence.*

*Advances in technology have made security systems more efficient. We are now able to integrate lighting, key fobs, and surveillance cameras in residential applications.*

*Light has the ability to define the atmosphere in any given area. With lighting control systems, we are able to establish the mood of a room.*

*Soundscapes also specializes in many commercial applications. Some of these services include computer cabling, certification of data lines, alarm systems, and surveillance cameras.*

*Above: A close up view of an ethernet patch panel in a computer networking system. Below: An example of a camera in a commercial environment.*

*Our design staff and installers are continuously trained to properly install these diverse products.*
